## Work experience

S3 Corp

2022-08 - present

### ReactJS Developer - Acting Technical Lead

- Building a portal system based on functional requirements from PMs and BAs, acting as the main contact point to discuss requirements and technical issues, ensuring timely delivery and system stability.
- Developing an information system for an e-commerce project, supporting online payment and customer payment management for Singapore clients.
- Leading a team of 5 junior developers, providing guidance, mentorship, and conducting code reviews to ensure high-quality deliverables and adherence to best practices.
- Testing the system, identifying bugs, and implementing fixes to maintain system integrity.
- Participating in daily scrum meetings to report progress and discuss solutions for technical challenges.
- Utilizing tools such as GitLab, Jira, and Figma for code and task management.
- Technologies: ReactJS, HTML, CSS, JavaScript, Git, and Visual Studio Code.

S3 Corp

2024-06 - present

### NextJS Developer

- Migrating an e-commerce site from ReactJS to NextJS, achieving significant improvements in page load times and user experience.
- Enhancing search engine optimization (SEO) for increased online visibility.
- Technologies: NextJS, HTML, CSS, and JavaScript.

Hiep Phat Driving Training Centre

2020-10 - 2022-08

### ReactJS Developer

- Developed an information system to support online learning for students and streamline staff activities.
- Implemented functional requirements from company leaders, ensuring system alignment with business needs.
- Conducted system testing, identified bugs, and resolved issues to maintain system performance.
- Participated in weekly stand-up meetings to report progress and discuss solutions.
- Technologies: ReactJS, Node.js, MongoDB, Redux, GitLab, and Visual Studio Code.

Hiep Phat Driving Training Centre

2021-05 - 2022-08
